

# Discussion of Project Evaluation Materials from FNAI

ARC meeting  
February 19, 2010

# Discussion Outline

- **Review Expert Workshop Recommendations**
  - Potential data and analysis revisions
  - Where to focus effort in 2010
- **Review Measures Matrix**
  - Focus on numerical performance measures (FNAI) vs. criteria and other ranking considerations (DSL)
  - Existing, planned and potential changes to data and bubblesheet as a result of new rule
- **Potential Changes to Bubblesheet**
  - New measures & acquisition categories
  - Other options for comparative analysis

# Council Recommendations

- Is the current 'bubblesheet' format useful?
- Is the preference for symbols or numbers or both?
- What other materials, if any, should be provided?  
Examples: Single Resource Rank raw data worksheet;  
Interactive Map application
- Suggestions by Council for other materials?
- Does the Council agree with current priorities for data revision and development?

**Florida Forever Conservation Needs Assessment**  
**Summary Recommendations of Expert Advisory Group Workshop – December 9, 2009**

There were 19 attendees from the following agencies: FNAI, FDEP, NFWFMD, SJRWMD, UF, DOF, FWC, Ecospatial Analysts, Breedlove Dennis & Associates, Archbold Biological Station, The Conservation Fund, Muller & Associates. Experts from The Nature Conservancy and SWFWMD were unable to attend but have been included on communications.

Priority Issues:

- **Management Feasibility** – we need to develop measures to assess whether acquisitions will enhance manageability of existing conservation lands, including ecological integrity, recreation access, smoke buffers, etc. FNAI will pursue this in Spring 2010.
- **Regulatory Easements** – we need a database of permanent regulatory easements to complement the FNAI managed areas database and complete the picture of conservation. FNAI has been developing this concept but there is currently no funding.
- **Climate Change** – this is a new acquisition category for the FL Forever workplan; criteria are needed in order to assess projects' contribution to climate change issues. Current climate change data not sufficient for comprehensive project analysis, so there's a need to explore future analyses.

Individual Measures Data:

- **Large Landscapes** – the group agreed that the current data needs revision. There was discussion of patch size & integrity as potentially better data. FNAI will develop new draft data in Spring 2010.
- **Natural Floodplain** – the group agreed that the current data layer needs revision. There was discussion of using natural land cover within FEMA 100-year floodplain, but FEMA data does not currently exist statewide. FNAI will explore methods and criteria in Spring 2010.
- **Wetlands** – the group agreed with FNAI's proposal to use FLUCCS as source data for wetlands (formerly used NWI).
- **Recreational Trails** – FNAI will work with OGT to refine methods for evaluating projects based on trails priorities. Refined methodology will be applied in Spring 2010.
- **Population within 100 miles** – this is a new numeric performance measure for FL Forever. The group agreed on a basic approach for data development; FNAI plans to report starting in Spring 2010.
- **Forestry** – FNAI is working with DOF to update this data layer; planned for Spring 2010.

Decision Support Data:

- **Natural Communities** – FNAI will remove coastal wetlands from Communities DSD layer because it is already included in Wetlands DSD layer. Will continue to report progress protecting coastal wetlands as part Fragile Coastal Resources measure.
- **Watersheds** – the group agreed that this DSD layer needs to be reviewed to adequately address potential redundancy among water resource layers and that the name "Watersheds" for this layer is misleading. FNAI will explore revisions to this layer, along with a new name, in Spring 2010.

F-TRAC:

- The group recommended that DEP use F-TRAC to inform priorities for parcel acquisition.
- The group recommended continuing both the statewide and on-projects F-TRAC scenarios.
- FNAI will add recharge and large landscapes to F-TRAC in future.

Benchmarks Report:

- Consider reporting progress against two sets of benchmarks – statewide (current) and on-projects.
- Unresolved – who should set benchmarks: experts or ARC?
- Include discussion of Benchmarks on future ARC agenda

**Summary of Goals, Measures, Criteria, and Ranking Priority in  
Revised Florida Forever Land Acquisition and Management Rule for ARC discussion, 19 Feb 2010**

| <b>Florida Forever Goals &amp; Measures Summary (Council shall employ when evaluating, selecting and ranking); See Revised Rule: pp 4 – 8, section (2), 18-24.0022</b>                           |   |               |                |              |  |
|--|---|---------------|----------------|--------------|--|
| Measure  | Abbreviated Description                       | Who Reports   | On Bubblesheet | Availability | Comments   |
| <b>Goal A: Coordination and Completion of Projects</b>   |   |               |                |              |  |
| a.1  | Combined acquisition measures                 | DSL; FNAI     | N/A            |              | as measured and reported for (2) b,c,d, g below                          |
| a.2  | Alternatives to fee-simple                    | DSL; FNAI     | Planned        | Existing     | to be included as Acquisition Category                                   |
| a.3  | Partnerships                                  | DSL           | Potential      | Unknown      |  |
| a.4  | Percent complete                              | DSL; FNAI     | Current        | Existing     | included in <b>Percent Complete</b> column of bubblesheet                |
| <b>Goal B: Biodiversity</b>  |   |               |                |              |  |
| b.1  | Strategic Habitat Conservation Areas          | FNAI          | Current        | Existing     | included in <b>Species</b> column of bubblesheet with measure b.2        |
| b.2  | Rare Species Conservation Priorities          | FNAI          | Current        | Existing     | included in <b>Species</b> column of bubblesheet with measure b.1        |
| b.3  | Landscape Linkages                            | FNAI          | Current        | Existing     | included in <b>Landscapes</b> column of bubblesheet with measure b.5     |
| b.4  | Under-represented ecosystems                  | FNAI          | Current        | Existing     | included in <b>Communities</b> column of bubblesheet with measure c.6    |
| b.5  | Large Landscapes                              | FNAI          | Current        | Existing     | included in <b>Landscapes</b> column of bubblesheet with measure b.3     |
| b.6  | Imperiled Species                             | FNAI          | Current        | Existing     | encompassed within measures b.1 & b.2                                    |
| <b>Goal C: Natural Functions</b>   |   |               |                |              |  |
| c.1  | Management feasibility                        | Manager; FNAI | Planned        | Dec 2010     |  |
| c.2  | Restoration                                   | Manager; DEP  | Potential      | Unknown      |  |
| c.3  | Natural Floodplain Function                   | FNAI          | Current        | Existing     | included in <b>Surface Waters</b> column of bubblesheet with measure c.4 |
| c.4  | Surface Water Protection                      | FNAI          | Current        | Existing     | included in <b>Surface Waters</b> column of bubblesheet with measure c.3 |
| c.5  | Minimize Flood Damage                         | WMD           | N/A            | N/A          | focus of Water Management Districts                                      |
| c.6  | Fragile Coastal Resources                     | FNAI          | Current        | Existing     | included in <b>Communities</b> column of bubblesheet with measure b.4    |
| c.7  | Functional Wetlands                           | FNAI          | Current        | Existing     | included in <b>Wetlands</b> column of bubblesheet                        |
| <b>Goal D: Water Quantity</b>  |   |               |                |              |  |
| d.1  | Surface Water Storage                         | WMD           | N/A            | N/A          | focus of Water Management Districts                                      |
| d.2  | Water Resource Development                    | WMD           | N/A            | N/A          | focus of Water Management Districts                                      |
| d.3  | Groundwater Recharge                          | FNAI          | Current        | Existing     | included in <b>Aquifer Recharge</b> column of bubblesheet                |
| <b>Goal E: Public Recreation</b>   |   |               |                |              |  |
| e.1  | Recreation Potential                          | DEP           | Potential      | Unknown      |  |
| e.2  | Recreational Trails                           | FNAI          | Current        | Existing     | included in <b>Trails Network</b> column of bubblesheet                  |
| e.3  | Population within 100 miles                   | FNAI          | Planned        | June 2010    |  |
| <b>Goal F: Archaeological/Historical Sites</b>   |   |               |                |              |  |
| f.1  | Archaeological Sites                          | DHR; FNAI     | Current        | Existing     | included in <b>Archaeological</b> column of bubblesheet                  |
| f.2  | Historical Sites                              | DHR; FNAI     | Current        | Existing     | included in <b>Historic</b> column of bubblesheet                        |
| <b>Goal G: Agricultural and Forest Land</b>  |   |               |                |              |  |
| g.1  | Sustainable Forestry                          | FNAI          | Current        | Existing     | included in <b>Forestry</b> column of bubblesheet                        |
| g.2  | Forestland for Recharge                       | FNAI          | Current        | Existing     | encompassed within measures d.3 & g.1                                    |
| g.3  | Improved Agriculture                          | DOF           | N/A            | N/A          | focus of Rural & Family Lands  |
| g.4  | Unimproved Agriculture                        | DOF           | N/A            | N/A          | focus of Rural & Family Lands  |
| <b>Goal H: Urban Open Space</b>  |   |               |                |              |  |
| h.1  | Open Space in Urban Service Areas             | DCA           | N/A            | N/A          | focus of Florida Communities Trust                                       |
| h.2  | Working Waterfronts                           | DCA           | N/A            | N/A          | focus of Working Waterfronts   |
| <b>Florida Forever Criteria (Council shall give weight during project selection &amp; ranking); See Revised Rule: pp 3-4, 18-24.0021</b>   |   |               |                |              |  |
| 1  | Meet Multiple Goals                           |               |                |              |  |
| 2  | Part of Ongoing Effort                        |               |                |              |  |
| 3  | Enhances Management of Existing Public Lands  |               |                |              |  |
| 4  | Archaeological or Historical Value            |               |                |              |  |
| 5  | Assured Funding Sources                       |               |                |              |  |
| 6  | Regional Water Resources                      |               |                |              |  |
| 7  | Imminent Danger of Development                |               |                |              |  |
| 8  | Ecosystem Management Team Plan                |               |                |              |  |
| 9  | Everglades Restoration                        |               |                |              |  |
| 10   | Purchase at 80% of Appraised Value            |               |                |              |  |
| 11   | Alternatives to Fee Simple                    |               |                |              |  |
| 12   | Joint Acquisition                             |               |                |              |  |
| <b>Ranking Priority (Council shall evaluate the entire list of approved projects and rank them individually in numerical priority order); See Revised Rule: pp 12-13, section (3), 18-24.006</b> |   |               |                |              |  |
| a  | 80% Appraised Value or Joint Acquisition      |               |                |              |  |
| b.1  | T & E Species on Military Lands               |               |                |              |  |
| b.2  | Military Air Corridors                        |               |                |              |  |
| b.3  | Military Buffer Zones                         |               |                |              |  |
| c  | Comparative Project Analysis (Technical Data) |               |                |              |  |
| d.1  | Meet Multiple Goals and Criteria              |               |                |              |  |
| d.2  | Percent Complete                              |               |                |              |  |
| d.3  | Close Critical Gap                            |               |                |              |  |
| d.4  | Recreation Opportunities (SCORP)              |               |                |              |  |
| d.5  | Climate Change                                |               |                |              |  |
| d.6  | Additional Factors (e.g. public support)      |               |                |              |  |

EXAMPLE ONLY - for ARC discussion Feb 19, 2010

Florida Forever Project Evaluation Comparative Analysis, June 2010

NOTE: This table evaluates ONLY the remaining acres of projects according to the numerical performance measures listed. Other considerations such as willing sellers, active negotiations, completing projects, development threat, etc., are always part of any decision regarding project status. Please note that all ranks are assigned based on F-TRAC and single resource analyses without regard to Acquisition Categories.

|                        | Remaining Project Acres | Percent Complete             | Project Name                                | Resources included in F-TRAC 2020 Scenarios |                                    |         |             |                |          |          |                  |            |                | Resources and other Measures not included in F-TRAC 2020 Scenarios |                |              |                        |             |                      |                          |

**F-TRAC Notes:** There are more resources in Florida worthy of acquisition than can be acquired by the FL Forever program.

\* About **845,600 acres** are expected to be acquired on **FFBOT projects**. About 367,400 acres already have been acquired.

\* **F-TRAC** scores projects **relative to** the 478,200 acres remaining that are expected to be acquired on **FFBOT projects**.

**\*F-TRAC 2020 Statewide** looks statewide for the best places to acquire resources-- much of it not on current projects. This scenario is useful for viewing projects in a statewide context and can help inform decisions on adding or removing projects.

**\*F-TRAC 2020 on FL Forever Projects** only at existing and proposed projects for the best places to acquire resources. This scenario compares projects relative to each other and can help inform project anking.

Archaeological and Historic resource values were provided by the Florida Dept. of State, Division of Historical Resources. Remaining acres and Percent Complete based on FNAI managed areas database and FF\_acquired database as of April 2010.

Florida Forever Project Evaluation Comparative Analysis, November 2009

EXAMPLE for ARC Discussion, February 19, 2010

NOTE: This table evaluates projects ONLY according to natural resource values. Other considerations such as willing sellers, active negotiations, completing projects, management feasibility, development threat, etc., are always part of any decision regarding project status.

**1.** There are more resources in Florida worthy of acquisition than can be acquired by the FL Forever program.  
 \* About 845,600 acres expected to be acquired on FFBOT projects. About 367,400 acres already have been acquired.  
 \* F-TRAC scores projects relative to the 478,200 acres remaining that are expected to be acquired on FFBOT projects.

**2.** This F-TRAC scenario looks statewide for the best places to acquire resources--much of it not located on current FL Forever projects.  
 \* Useful for viewing projects in a statewide context.  
 \* Can help inform decisions on adding new projects or removing existing projects.

**3.** This F-TRAC scenario looks only at existing and proposed FL Forever projects for the best places to acquire resources.  
 \* Assumes all acquisitions will occur on current projects. Compares projects relative to each other.  
 \* Can help determine whether projects belong on the A or B list.

**KEY**  
 5 Very High  
 4 High  
 3 Medium  
 2 Medium-Low  
 1 Low

**BOLD CAPS**  
 indicates a Group A project that received 3 or more votes as a top 21 project by the Acquisition and Restoration Council during the December 14, 2007 ranking.

☐ = Remaining project area intersects proposed corridor for the Florida National Scenic Trail

All scores are based on remaining project acres.

Florida Forever Resource Evaluation Table for Species, November 2009. Bold lines indicate breaks between resource values of "very high", "high", "medium", "medium-low", and "low-none" as shown on the Summary Table. Evaluation is based on remaining project acres.
