¹Acreages are counted once under the primary managing agency even though there may be several owners and/or managers. For this reason, total acres for some agencies may be higher than the acres to which they hold title and others may be lower.

²Acreages listed include terrestrial wetlands such as the Everglades but exclude 3,668,410 acres of submerged marine, lake, or river bottom (such as state aquatic preserves or Florida Bay) that are part of certain managed areas.

³Numbers include a total of 806,116 acres less-than-fee properties (7.7% of total conservation lands).

⁴Represents the less-than-fee lands included in the FNAI conservation lands database as of 1 February 2015. All properties are owned by either private individuals or private foundations or corporations. Lands are classified by the agency or organization that monitors the easement on the property. The same agency or organization usually holds title to the easement, but there are a few exceptions.

⁵Acreage total includes all permanent Wetlands Reserve Program and Grassland Reserve Program easements held by USDA Natural Resources Conservation Service.

⁶Acreage total includes all non-submerged acres within official federally designated boundaries of National Park Service lands.

⁷Lands owned by the State that are not currently leased to a governmental agency.
