Growth Habit: Shrub, Tree

Origin: Asia Temperate, Asia
Tropical, Australasia, Pacific

Brenda Herring

Description: Deciduous tree that grows up to 15 m high. The leaves are alternate, 2 or 3 times compound, and are up to 0.5 m long. The leaflets have a smell when crushed, are dark green above, with some pubescence along veins. The leaflets are lighter green below and are generally glabrous. The inflorescences are showy that form from leaf axils.

Habitat: Disturbed sites

Florida Introduction Date: Earliest Florida specimen available vouchered in 1983

Control Methods: .

Chemical: Basal bark (10-30% triclopyr ester). Addition of 3% imazapyr will increase consistency. [IFAS].
