

## FNAI Current and Historic Natural Community Polygons: Data Attributes, Definitions, and Values

ATTRIBUTE	VALUE
<b>SITE</b>	Name of the property.
<b>POLYGON_ID</b>	Unique number assigned to each polygon.
<b>FNAI_NC</b>	Current natural community type, using the FNAI classification system. <b>Applies to Current NC Mapping Data only.</b>
<b>HISTORIC_NC</b>	Historical natural community type, i.e., the type of natural community that occurred at this point prior to disturbance or alteration, using the FNAI classification system. <b>Applies to Historic NC Mapping Data only.</b>
<b>INCLUDEDNC</b>	FNAI Natural community types that are included within the polygon. An inclusion may or may not have a data point of its own. There may be more than one included community per polygon.
<b>COMMENTS</b>	Comments is an optional field used by the surveyor to provide additional information about the designated historical natural community.
<b>ACRES</b>	Area in acres of the polygon as calculated in GIS.
